

Chemical Indicators

Custom Indicator Labels

NAMSA Custom Indicator Labels allow clients using Chemical Process Indicators (CPI's) to save time and money by combining multiple labels into one unified label reducing application time and effort. Custom Indicator Labels can be manufactured in any size or shape with preferred indicator colors. Any of the vibrant color transitions available can be used to manufacture a custom label. NAMSA Custom Indicator Labels are available for Chemiclave, Dry Heat, EO, Hydrogen Peroxide, Radiation, Steam and Steam-Formaldehyde processes.

The design of a Custom Indicator Label is driven by our clients' processes. Labels may include verbiage, logos, or blank areas for printing lot specific information. Custom Indicator Labels can be manufactured using a variety of substrates including laser or thermal transfer label stock and Tyvek.

NAMSA also offers Sterilization Indicating Inks in most of the color combinations outlined. Please inquire for distribution information.

Available Indicating Inks for Use on Base Stocks

Process	Initial Color	Signal Color
Chemiclave	Green	Violet
	Yellow	Green
	Uncolored	Blue
Dry Heat	Pink	Violet
	Orange	Brown
	Gray	Blue
EO	Violet	Green
	Yellow	Blue
	Yellow	Brown
	Red	Green
	Red	Yellow
	Blue	Green
Hydrogen Peroxide	Red	Yellow
	Blue	Pink
	Violet	Pink
	Red	Blue
	Yellow	Blue
	Blue	Green
Radiation	Yellow	Red
Steam	Blue	Pink
Steam Formaldehyde	Violet	Green
